So here are some tips on how to collect these famous items quickly and easily. Follow the guide! Our tips for getting started with catalyst farming Although the drop rate of catalysts in Epic Seven is quite low, they are usually obtained by completing specific levels several times, especially those present in the HnR (Untold Story): a panel of maps that unlocks after completing Episode 1). You will find at the end of the article the most relevant locations according to the desired catalysts. Furthermore, if there is an event going on and you have a good team, farm the only level with a variable difficulty and choose the highest one. This way, you will quickly collect a maximum amount of currency to spend in the special shop, which usually offers many items, including catalysts. But before rushing to do levels in a loop, it is essential to have a good pet. Indeed, this little creature will give you significant bonuses, increasing the rewards obtained at the end of the mission (exchange currencies, catalysts...). In other words, with a bit of luck, you can even win random catalysts as an extra. Other ways to get Epic Seven catalysts Firstly, being part of a guild gives you access to an internal shop which is updated every week where 5 chests giving you rare and epic random catalysts are to be collected. In addition, you can also ask for help from members to get these precious resources for free. Another way to get your hands on specific catalysts is to use the automated tour. It is updated every fortnight and, as well as being very fun to do, there are also rewards consumable boxes that allow you to select the catalysts of your choice. Finally, don't forget the alchemist's bell tower in the sanctuary. Indeed, if you improve the laboratory in the bell tower up to level 3 with your Orbis breaths, you will unlock the possibility of transforming the catalysts you have no use for into those you are looking for. Of course, the more epic the latter is, the more valuable it will be, so we recommend that you always farm levels with epic catalysts. The best cards to get Epic Seven catalysts Here are the optimal locations to get the famous catalysts of Epic Seven. Each location has a shop where you can buy the desired catalyst with the local currency obtained by completing the levels in that area. If it's a rare catalyst, it will always be accompanied by another one of epic rarity due to their value, giving you the opportunity to convert it into many different catalysts. If you need it, you will have to make a choice: Level with Jelly + an epic catalyst: HnR 3S: S2 or HnR 7: 7-S1. Level with an epic catalyst, but jelly only obtainable in the shop: UH 1 (1-S2). In summary, there are a multitude of ways to obtain Epic Seven catalysts. However, favour the current event by using a pet with suitable skills. Don't forget to do the content that renews itself (Automaton Tower, Guild Request, Alchemist's Bell Tower) and then you'll already have a few catalysts guaranteed on a regular basis. If that's not enough, thanks to our guide, you now know where to go to get the Epic Seven catalyst you want! Enjoy the game and the farm! Drops are based on ingame loot table data. Recommended Drops are based on the number of enemy (that can drop that particular item) appearing in that stage. Note: Characters with the same Zodiac sign share the same Catalyst requirement Most Catalyst can be found in the same map on both difficulties (unless it was previously an Exploration stage). Epic Catalyst can only be found in World Difficulty (WD). The drop rate for Catalyst is super bad. The best way to acquire Catalyst is through events. Remember to do them and exchange all Catalyst rewards with your event tokens.
